

# Population-based Sero-epidemiological Investigation of COVID-19 Virus Infection in Singapore

1. To determine the extent of COVID-19 infection in the general population
2. To evaluate the feasibility of a temperature monitoring wristwatch and mobile app for detection of outbreaks during the COVID-19 pandemic

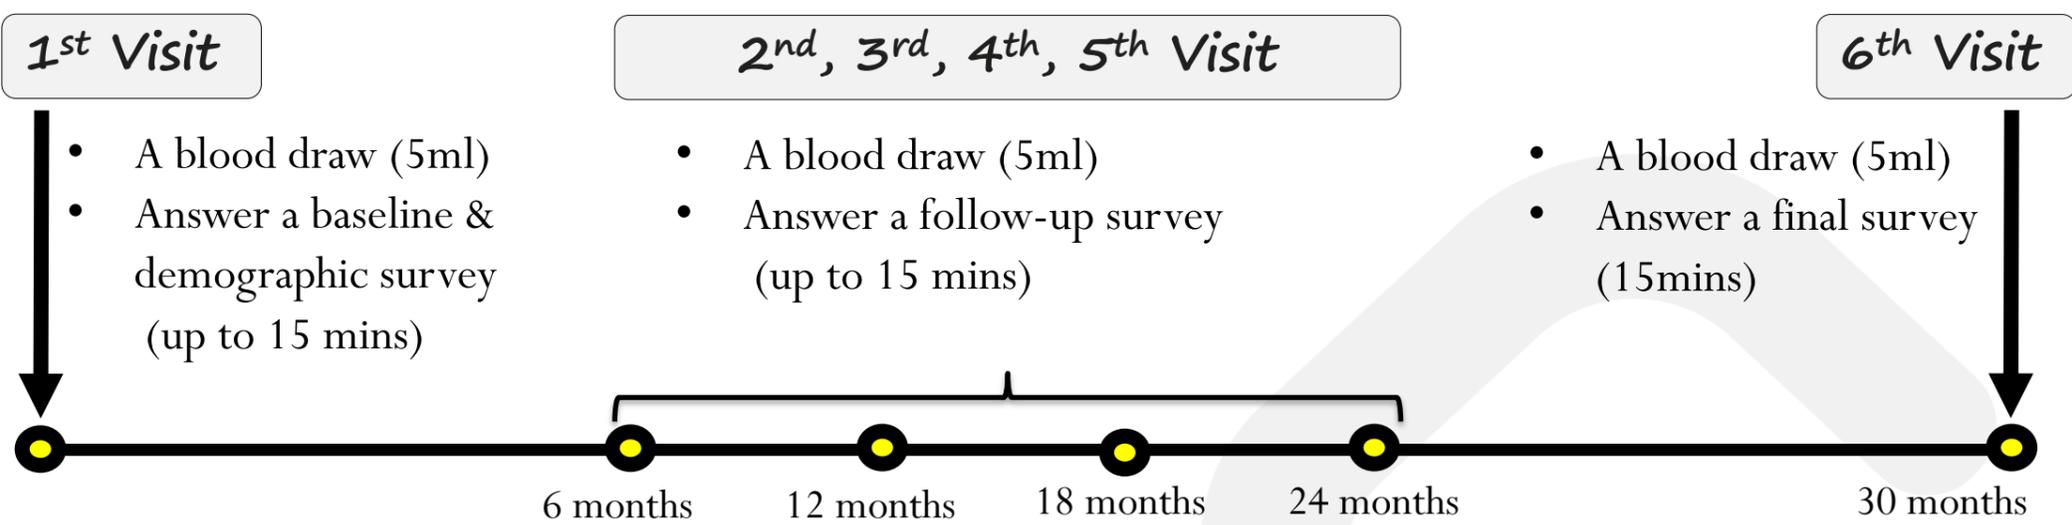

## PARTICIPATE IN THE SERO-EPIDEMIOLOGICAL STUDY NOW

### Who May Participate?

- Aged 6 and above
  - Willing to use a smartphone / tablet to fill up surveys throughout the study
- \*\* For minors (less than 21 years old), one parent/legal guardian must also join the study and give consent. The parent/legal guardian will oversee their daily symptom survey.

### What is Required of You?

#### Optional:

- Answer a daily (yes/no) question
- Symptom survey (5 mins) on our mobile app / web-link only when unwell
- Temperature tracking wristwatch

### Who to Contact?

**NCID Sero-Epi Study Team**

**Email : seroepi@ncid.sg**

**Telephone (Whatsapp Only): 97296905**

### Cost & Reimbursement

- No charge for the test
- You will be reimbursed for your time and effort
